

Insurance Journal Mentions Lathrop GPM's PFAS Playbook

September 16, 2021

Lathrop GPM's PFAS Playbook blog was mentioned in an August 20, 2021 *Insurance Journal* article, "Maine Enacts Law That Will Ban Use of 'Forever Chemicals' in All Products by 2030." The article, which discusses a recent piece of legislation in Maine aimed at banning the use of PFAS compounds in all products by 2030, directly references Lathrop GPM's July 19, 2021 blog post titled, "Maryland, Maine and Vermont Advance PFAS Legislation." The blog post, authored by David Shorr, Matt Walker, and Shanna McCormack, talks about three northeastern states that have recently taken legislative action to address PFAS in consumer products and the environment.
