- U.S. District Court for the Western District of Texas
- U.S. Patent and Trademark Office

Robert Lord

Partner | robert.lord@lathrooggpm.com

According to one client, "Robert did an outstanding job of getting my patent granted. He quickly had a deep understanding of my invention and he did a terrific job of helping the examiner recognize the unique aspects of our patent application. He is very smart and easily understood complex technical differences, [and] he is able to successfully communicate those differences in a less technical way to patent examiners. It was a pleasure working with Robert."

Robert Lord brings a blend of intellectual property experience to the table—almost three decades melding legal experience, technical know-how, business acumen and political insights. Distinguished for creating practical, business-oriented strategies to tackle complex challenges, he listens empathetically, comprehends the intricacies of technology, then constructs alignment between stakeholders with competing interests. Robert's advocacy before the USPTO and courtroom has led to remarkable outcomes that fulfill client expectations.

Clients select Robert for his unparalleled capacity to grasp, articulate and navigate the convergence of technology and IP law. He dedicates his practice to resolving IP issues, be it client counseling, portfolio management, or fervently upholding IP rights in disputes. He works with clients in a variety of industries to procure and safeguard their intellectual property rights including:

- Copyright registration and litigation
- Inter Partes Review (IPR) proceedings
- International Trade Commission (ITC) investigations

EDUCATION

Baylor University School of Law,
J.D., 1994

Baylor University, B.A.,
Computer Science, 1991

- IP agreement drafting and review, and due diligence
- Patent preparation, prosecution, management and litigation
- Patent Trial and Appeal Board (PTAB) proceedings
- Post Grant Review (PGR) proceedings
- Trademark preparation, prosecution and litigation

Robert caters to a diverse spectrum of clients, from Fortune 100 corporations to individual innovators, primarily in the high-tech and business method sectors across technology hubs such as Silicon Valley, New England, Austin, Toronto, and beyond. His industry knowledge also includes:

- Aerospace
- Artificial Intelligence
- Autonomous Devices
- Compilers
- Data Storage
- Energy
- Fintech
- Machine Learning
- Medical Devices
- Network Security and Network Stack
- Oilfield Services Technology
- Operating Systems
- Power System
- Safety and Emergency Preparedness Equipment
- Satellite Imagery
- Software Engineering
- Wireless Technology

Fueling his practice is the thrill of disentangling intricate technology and legal principles while cultivating lasting bonds with clients and peers. Proudly reflecting on recent matters, Robert's highlights include deftly securing intellectual property rights and averting potential legal hardships. From swiftly negotiating licenses below demand or budget to attaining settlements that cover legal fees and protect client interests—

his accomplishments are testaments to safeguarding client IP assets with discretion and finesse.

When asked about his work ethos, Robert describes it as "client-first—delivering high service, quick responsiveness and value, and understanding the client both professionally and personally." This philosophy extends beyond the office walls into celebrating mutual growth and victories.

WHEN ASKED ...

What inspires you about the practice of law?

To help others create value in whatever they do be it monetary, balancing priorities, or even self-satisfaction is deeply gratifying. Particularly, I was always fascinated by computers from the first time I touched one and saw early on the potential for innovators to create massive value worldwide.

What do you do outside of work?

I enjoy family, gardening, local politics, and am a tree farmer of a 63 acres tract of land on Sam Rayburn Reservoir in East Texas.

REPRESENTATIVE EXPERIENCE

- Handled a patent infringement matter involving technology allegedly related to determining pricing for auto insurance based on driving habits. Resolved the matter quickly to acquire a license to the patented technology for a fraction of the original demand.
- Managed a patent infringement matter involving lighting technology. Resolved the matter very quickly as part of a joint defense group to acquire a license to the patented technology for far less than the client budgeted.
- Obtained a settlement where the client covered all legal fees and prohibited the alleged infringer from working with the primary clients of the company in a copyright infringement matter involving shelving systems at convenience stores.
- Handled a trademark infringement matter where the expert report stated that the trademarked logo and the alleged infringing logo would result in a likelihood of confusion for similarly situated

consumers. A notice of settlement was filed in the matter where the company (and any authorized third parties) using the alleged infringing logo will no longer use the mark.

- Managed a trademark infringement matter where the defendant in Alabama stopped using the mark and settled the lawsuit without even filing an answer to the complaint.

Presentations

- Presenter, "A Crash Course on Patent Prosecution for Patent Litigators," Practising Law Institute PLI Fundamentals of Patent Litigation, 2013-2024
