

Gray Plant Mooty Congratulates 2014 Minnesota Cup Winner 75 Fahrenheit

September 11, 2014

Gray Plant Mooty congratulates the 2014 Minnesota Cup grand prize winner, 75 Fahrenheit, from the Clean Tech division. 75 Fahrenheit (75F) is a temperature controlled system that fixes wider temperature imbalances in commercial settings while saving energy. With this new take on the traditional HVAC system, users are shown to save an estimated 24 percent in costs.

The Minnesota Cup is an annual competition focused on new Minnesota-based business concepts and innovative ideas. Since its inception in 2005, the Minnesota Cup has grown to become the largest statewide new venture competition in the US. This year's competition included seven divisions: Energy/Clean Tech/ Water, General, High Tech, Life Science/Health IT, Social, Student, and Food/Agriculture/Beverage. After a winner is chosen from each division, the division winners then compete for the grand prize.

In our seventh year of sponsoring the Minnesota Cup, Gray Plant Mooty is again proud to be a division sponsor.
